

Uninstall Previous Universal Print Driver: PRINT-IT

Thursday, December 12, 2013

With the terminal server operating system upgrade and Qbooks v14 upgrade, we have had to also change our universal print driver program to assist in printing to printers. The previous edition, PRINT-IT should be uninstalled if any printing problems are encountered. The new universal print driver is called TSPRINT.

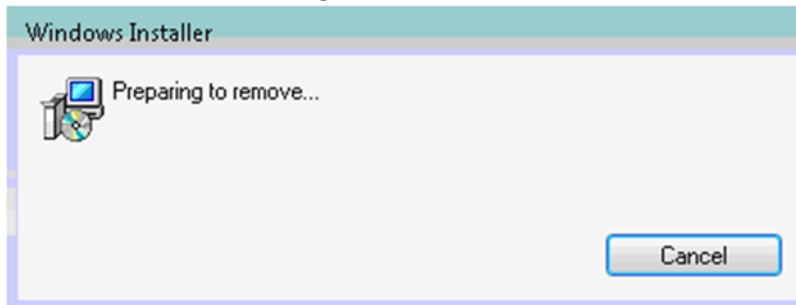

1. To UNINSTALL the old software called PRINT-IT...
2. Goto CONTROL PANEL
3. Goto Add / Remove Programs [Windows XP flavors] or Programs and Features [Windows Vista, 7, 8]
4. Scroll down to PRINT-IT CLIENT
5. Right-click on it to UNINSTALL or click REMOVE [depending on your operating system]

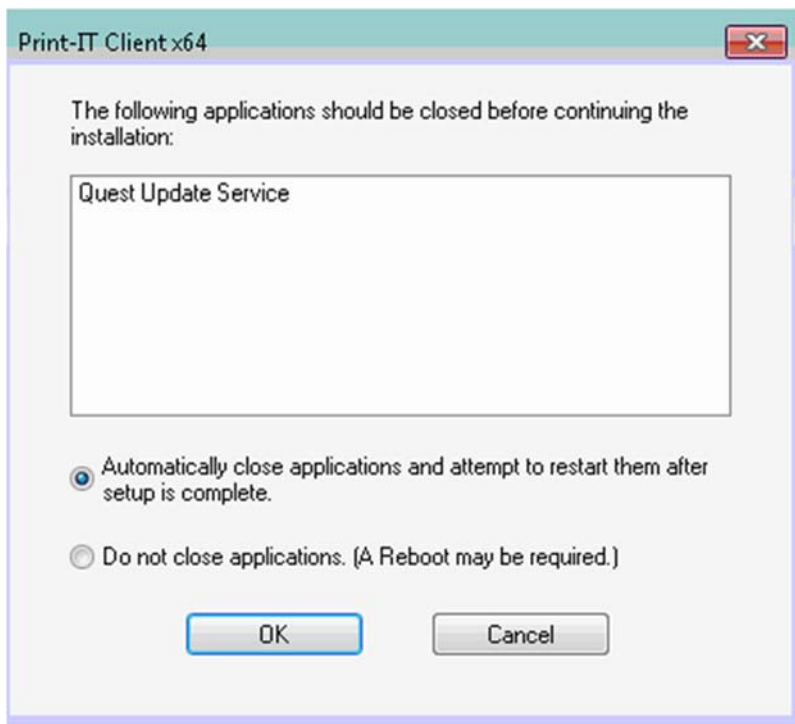

6. You may see this dialog window, click OK to continue the uninstall process...

7. There will be several dialogs ...

8. If this appears, click OK

9. It should now be uninstalled from your system.
