

How to Disable the Windows Firewall

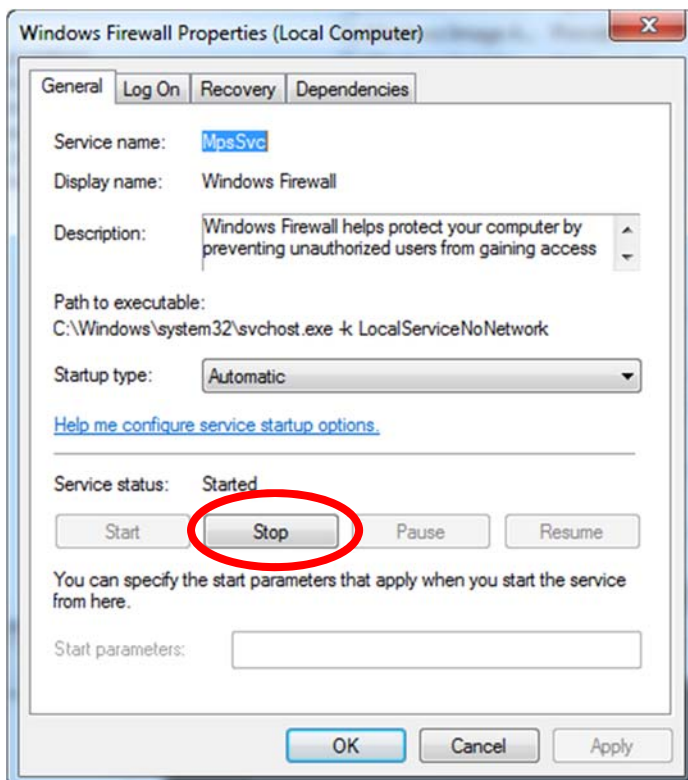

Thursday, December 12, 2013

To prevent "arguing" between multiple firewalls, typically it is easiest to disable the Windows firewall

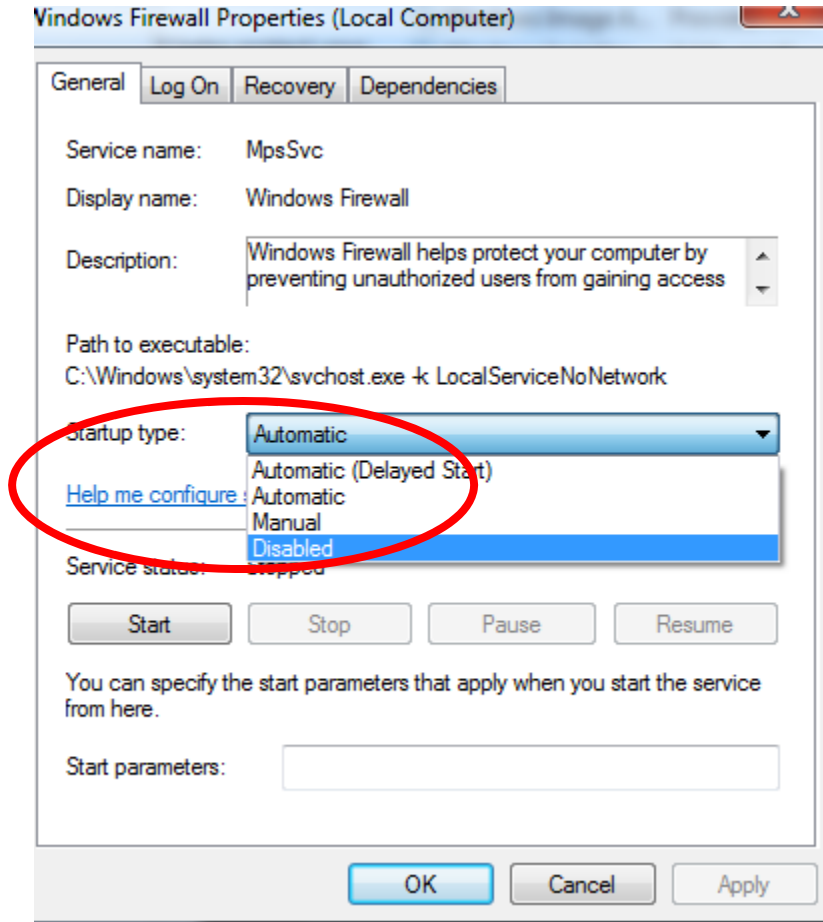

1. Goto **Control Panel**
2. Open **Administrative Tools**
3. Open **SERVICES**
4. Scroll down to **WINDOWS FIREWALL**

5. Double-click the WINDOWS FIREWALL line entry
6. Click **STOP** on the appearing windows dialog

7. Change the STARTUP TYPE to DISABLED

8. Click APPLY
9. Click OK
10. Process complete.
